

Our school is interested in going on a farm excursion, but unsure how to go about it. What should we do?

NT Farmers can help! Please contact edo@ntfarmers.org.au who can help organise a farm visit.

We can't go on farm excursions, but would like to participate in other activities. How can we get involved?

There are lots of agricultural activities you can participate in without leaving the classroom. Check the "Activities" section for more information.

The school curriculum is already crowded. How can I incorporate agriculture into my classroom or subject area?

It's easy to add agriculture to all of your classes! Check the "Teachers" page for curriculum-linked resources that are ready to implement straight into your classroom.

Some of my students are interested in a career in agriculture but I don't know anything about it! What advice can I give them?

Agricultural careers are diverse and there is something from everyone. There are agricultural jobs in the city and country and you don't have to be a farmer to work in agriculture. Check the "Careers" and "Inspiration" pages for agricultural careers. If you would like an agricultural professional to speak with your students at school, please contact edo@ntfarmers.org.au
